

Ideal for
HD video and
action photos

Kodak

SD High-Speed Card

Industry leaders Lexar and Kodak have joined forces to deliver a comprehensive selection of memory cards in various formats, speeds, and capacities. These cards deliver the brand quality that Kodak customers have come to expect, teamed with the advanced performance of Lexar memory card technology.

Secure Digital (SD) memory cards are designed for use with SD-enabled digital devices, including cameras, MP3 players, and more. The KODAK SD High-Speed Card is engineered for rapid-fire picture taking and smooth, TV-quality video. The KODAK SD High-Speed Memory Card is available in 2GB capacity.

Versatility and Performance

High-Speed Performance. The KODAK SD High-Speed Card provides you with the speed and performance to shoot action photos in quick succession or fully leverage the video capabilities of your point-and-shoot digital camera. The card gives you the extra storage capacity to capture that perfect moment.

Video Versatility. The KODAK SD High-Speed Card is designed for a range of popular uses, and is engineered for smooth, TV-quality video, while also allowing for faster picture capture. It is ideal for use with KODAK or other digital cameras that are 4 megapixels and higher.

The Best of Both Worlds. Enjoy the combined benefits that KODAK brand quality and Lexar technology deliver. And you can keep it Kodak by adding the KODAK SD High-Speed Card to your existing line-up of other trusted KODAK products, while enjoying the advanced, innovative memory card technology provided by Lexar. Whether you're rapidly shooting a multitude of photos or capturing video with your digital camera, the KODAK SD High-Speed Card is an ideal choice for capturing and securing your most treasured memories.
